

Specifications

- Product** Pro-Treat 151
 - Application** Drain pans and drain lines
 - Purpose** Wagner Pro-Treat 151 is an EPA-registered pan treatment tablet that will penetrate and stop algae and fungi growth, slime and other bio-fouling in condensate drain pans and condensate drain lines. Pro-Treat 151 eliminates odors caused by these organisms, and prevents pan overflows from fouling-plugged drain pans and drain lines. It is designed to penetrate and break up accumulated sludge and allow it to flow out of the drain pan along with the condensate water.
 - Advantages** Wagner Pro-Treat 151 is a simple, ready to-use tablet. The treatment dosage is 1 tablet per ton of system capacity. This adds convenience and economy since only one size tablet is required for treatment even when servicing multiple sized units.
 - Dosage** 1 tablet per ton of system capacity
 - Directions** Position the tablet in the pan so that it is moistened by condensate water. The tablet should be placed as far from the drain as possible, but still in contact with the condensate water. For best results, do not allow the tablet to become submerged in the condensate water. Check the unit once per month to ensure continuous treatment.
 - Safety Data** Consult the Material Safety Data Sheet before using this product. Do not use this product until you have read all warning statements on the label and have consulted the MSDS. Avoid eye contact and prolonged skin contact. Do not take internally. Wash hands thoroughly after using this product.
- Keep out of reach of children.**
