## For Mini-Split or Duct-Free Systems

The AG-9300 Series are electronic condensate drain sensors for mini-split or duct-free systems.

The AG-9300 Series features the AG-9300-U, which is the first universal condensate water sensor developed to be compatible with all major manufacturers' mini-split or duct-free systems currently on the market in addition to specifically developed electronic condensate drain sensors with exclusive wire harness connectors for Mitsubishi, LG, and Comfort Star units.

Each system continuously monitors any condensate overflow in the primary drain pan and automatically shuts off the mini-split or duct-free system and activates an alarm if any overflow is detected.
