

Commercial Air Purification System

By RGF Environmental

The HALO-ROVE™ Commercial Air Purification System

The HALO-ROVE™ utilizes RGF's patented Photohydroionization® (PHI-CELL®) technology to substantially reduce airborne and surface bacteria, viruses, odors, mold and VOCs (chemical odors). The HALO-ROVE™ is designed as a standalone, portable active air purifier capable of treating up to 1,000 square feet.

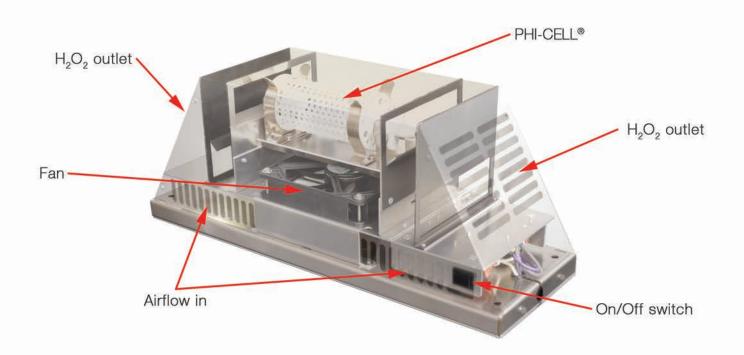

Why Use RGF's Photohydroionization® Technology?

Photohydroionization® (PHI) is an active air treatment technology. Active air treatment is the process of reducing air and surface contaminants by recreating safe, natural levels of hydrogen peroxide (H_2O_2) in occupied areas.

RGF's patented PHI-CELL® technology combines a photocatalytic process and a multiwavelength UV source to create active air purification. The combination of UV light and a hydrated quad-metallic catalyst drives a reaction that produces low level, airborne H₂O₂. RGF's PHI-CELL® air treatment systems are operating safely in over four million installations globally.

HALO-ROVE™ - Commercial Air Purification System

The HALO-ROVE™ quietly circulates air around the space while creating and distributing low-level airborne hydrogen peroxide (H2O2). Testing shows significant reductions in viruses, bacteria, mold, and odor within minutes of operation, resulting in safe, clean air within the treated space.

Ideal for use in:

- Offices
- Classrooms
- Conference rooms
- Daycares

- Restaurants
- Bathrooms
- Boats
- Locker rooms

ITEM#	REPLACEMENT CELL	ELECTRICAL	WATTS	DIMENSIONS	SHIP WT.
CAPS-CMTR-120-R	PHIC-CAPS-CMTR	120 VAC	12	18"W v 6 25"H v 6 25"D	5 lbs

Aluminium housing •Materials: •PHI-CELL® Replacement: Recommended after 18,000 - 25,000 hrs. Warranty 1 year
