

# Ozone Monitoring / Sampling Equipment

This professional Indoor Air Quality Sampler will take 500 liters (.5 cubic meters) of indoor air and deposit the microbes on a petri dish, giving you a broad sample of the indoor air quality.

### Benefits

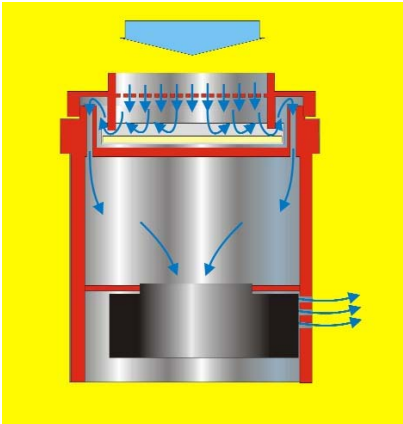

- Polished aluminum for years of service and easy cleaning
- Easy to use
- Pre-calibrated
- Provides a professional air quality test
- The RGF CAS draws a broad sample of room air into the petri dish for a more quantitative test over the settling plate method
- Includes 10 petri dishes
- Includes 110 volt wall adapter

### Specifications

Voltage	12 Volt DC
Current (Standby)	.025 A
Current (Max.)	.35 A
Current (Operating)	.25 A
Air Flow	100 liter per min. (+/- 5%)
Material	Aluminum
Timer	5 minutes
Dimensions	5" W x 6" H

Includes 10 Petri Dishes  
Re-Order using Item # PT-009T

<b>Item #</b>	<b>Description</b>	<b>Ship Weight</b>
