

RGF[®]

ENVIRONMENTAL GROUP, INC.

Condensate Pan Microbial Reduction Unit

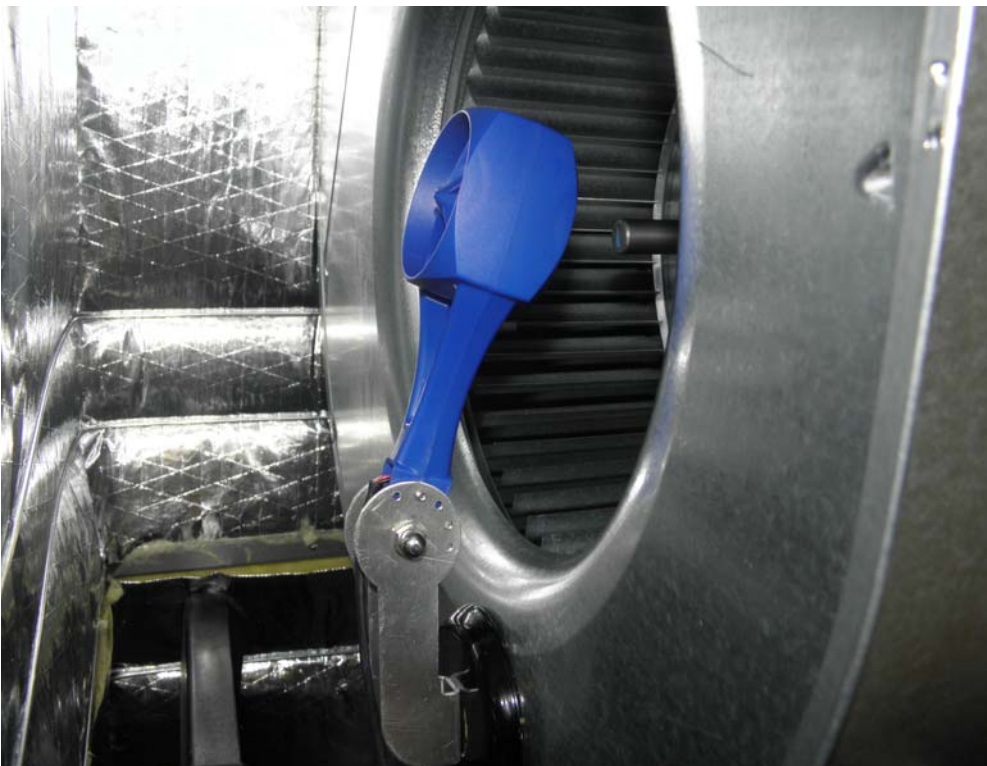

Patent Pending

The *Pan Saver* by RGF[®] is designed to eliminate microbial growth in HVAC system condensate pans and drain lines. Utilizing a micro turbine which is driven by the suction side of the system blower, low voltage is produced and sent to the anode which disperses silver and copper ions into the condensate water.

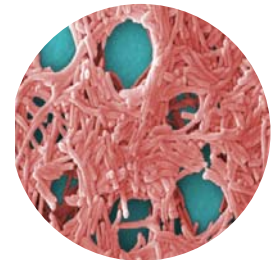

MAINTENANCE FREE FOR 2 YEARS

**Totally Green Product
Consumes No Electricity**

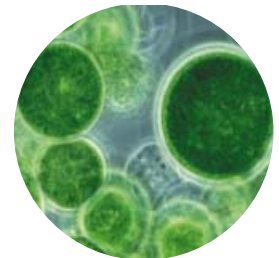

Simple magnetic mount installation

Pan Saver lab test results showed 99% reductions of microbes including Legionella

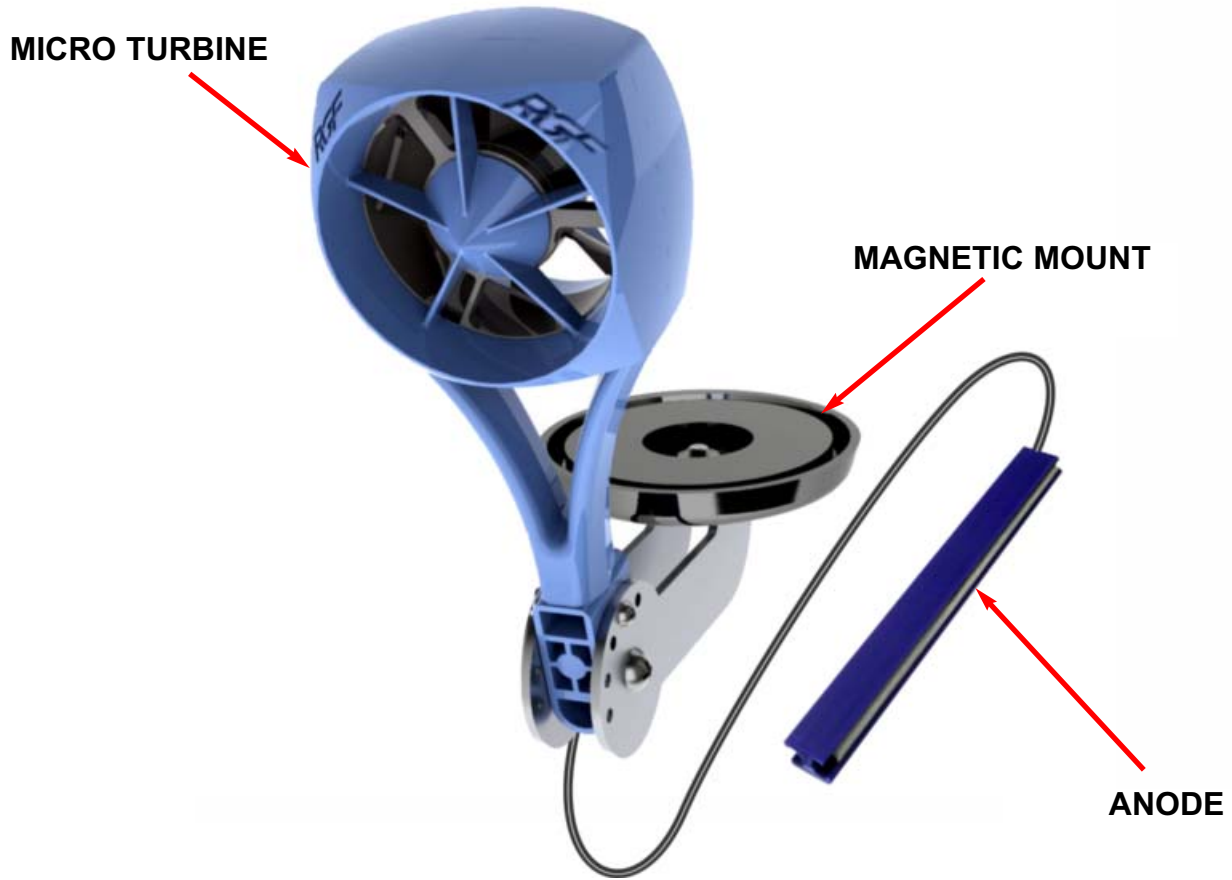

Legionella

Algae

PAN SAVER

SPECIFICATIONS
