- ✓ Keeps HVAC systems running cleaner and more efficiently

Installs directly in the HVAC system

Typical residential air handler

☀️ UV Shield Included

☀️ Magnet Mount Included

This is a quality product made in the U.S.A. at Ultravation's Vermont plant. Don't settle for a cheap unreliable knockoff.

Now you can provide the power of UV light to create healthier indoor air for your customers with an UltraMAX air treatment system for HVAC.

☀️ Reliable Ballast made in the U.S.A.

☀️ UV Lamp Safety Lock

☀️ 6ft. Power Cable

Ultravation®

UltraMAX™ EZUV™

Whole House Germicidal UV Air and Surface Treatment

An UltraMAX™EZUV™ air treatment system is an easy-to-install, effective way to automatically clean your customer's indoor air of germs, allergens and odors.

Keeps the interior surfaces of the HVAC system free of mold and other biogrowth. This results in healthier air, a more efficient HVAC system and one that uses less energy! And, EZUV can reduce... often eliminate...expensive chemical coil cleanings. That saves energy and cleaning expenses while helping protect the environment!

*** Install in problem HVAC systems to reduce biological contamination.**

*** Replacement UV Lamps available from Airstar Supply**

Residential UVC lamps should be replaced every 9000 hours or approximately every 12 months. If the UVC lamps are strictly used for keeping coils clean on the HVAC unit, they can be retained for their maximum two-year life span.

Designed to fit new and existing HVAC systems

*** Install in new HVAC systems to keep them running like new.**

*** Simple 24V installation.**
